Catlin Arctic Survey - Theme Tune

Verse 1

To seek the truth

To know the real answer

We seek the truth

And send them on their way

It's time for us

To know the real answer

For this quest is now

And now it must be made

Verse 2

On and on

To find the real answer

So we may know

How fast the ice will melt

It's time for us

To know the real answer

For the ice is melting

Melting every day

Chorus

Walk on, Walk on

To find the real answer

Walk on, Walk on

Through the wind and snow

Over many days and many nights

Of cold and near exhaustion

They walk on

They walk on

Middle section

Melting, dripping into the sea

But it's important, it's what we need

Reflecting heat back into space

Keeping the Earth a cool place

Supporting life of many kinds

As we look we see the signs

A warmer sea expands in size

Over the land the sea will rise

Oil and shipping will seem improved

We think we'll gain when we'll lose

A warming world is what we face

We know the cause, the human race

Going, going, going away

How fast is it melting day by day?

Chorus

Walk on, Walk on

To find the real answer

Walk on, Walk on

Through the wind and snow

Over many days and many nights

Of cold and near exhaustion

They walk on

They walk on

Verse 3

The time is now

Come together for the answer

The Scientists

Are going to work it out

It's time for us

To know the real answer

How fast the ice

Melts and drips away

Chorus

Walk on, Walk on

To find the real answer

Walk on, Walk on

Through the wind and snow

Over many days and many nights

Of cold and near exhaustion

They walk on

They walk on

Chorus

Walk on, Walk on

To find the real answer

Walk on, Walk on

Through the wind and snow

Over many days and many nights

Of cold and near exhaustion

They walk on

They walk on
